

## Lumineers by Cerinate The Ultra-thin Veneers

### Introduction

We would like to feel more secure during the treatment that is aided by the proper knowledge of schedule, duration, side effects and complications of your treatment.

During the consultation your dentist is going to inform you on the given interventions in details. This informative supply aims at refreshing what has been heard and summarizing the answers of the most frequent questions. Please read carefully this handout prior to the initiation of your treatment and in case of any questions our doubt do not hesitate to consult with DentalCareBudapest.com.

The purpose of this handout is to provide information for you and your approval of treatment with full knowledge and informed consent in compliance with The Lisbon Declaration of WHO of 1981 and with Act CLIV of 1997 effective in Hungary.

### What are Lumineers?

Lumineers – the painless way to bring out the beautiful, healthy, natural, permanently white smile in you.

Ultra-thin Lumineers are custom designed to give you the beautiful smile you've always dreamed of. Unlike traditional veneers, there are no shots, no drilling of sensitive tooth structure, and no pain. They're even reversible, so you have nothing to lose and a beautiful smile to gain. Lumineers are proven to last for over 20 years, so your beautiful smile will be with you for years and years.

### Lumineers with Luminate in LUMITray Technology

And now, in addition to Lumineers, you can ask your dentist about Lumineers with Luminate in LUMITray Technology. It's new technology that allows your dentist to place your veneers all at once, instead of individually. Plus, it offers exclusive digital design and preview technology, which all adds up to less time in the dentist chair!

Transforming your smile couldn't be any easier; in fact, it takes just 2 easy visits.

Whether you transform your smile with Lumineers or Lumineers with Luminate in new LUMITray Technology, it takes only 2 easy visits to your dentist to bring out your beautiful smile. During your first visit a precision mold will be taken. You and your dentist will also choose the right shade for your new, permanently white smile. On your second visit, your custom designed Lumineers are checked for fit and shade. Then, they're painlessly attached.

That's it – a healthy, natural, permanently white smile you've always wanted in only 2 visits.

## Frequently asked questions

### How are Lumineers different from traditional veneers?

Lumineers are unique in that they are ultra-thin (approximately 0.2 mm) and ultra translucent. While traditional veneers are much thicker, requiring the grinding down of your original tooth structure, Lumineers are so thin, little to no tooth reduction is necessary. At the same time, Lumineers resist microleakage and microcracking.

### Are there any other Lumineers?

No. Lumineers can only be made from patented Cerinate porcelain and Lumineers with Luminite in new LUMITray Technology is the only porcelain veneer available with tray technology. These revolutionary processes are crafted through a proprietary process unavailable anywhere other than Den-Mat Holdings, LLC, one of the nation's largest manufacturers of professional dental materials.

### Is the Lumineers procedure painful?

Unlike traditional veneers, Lumineers are a completely pain-free way to reshape and permanently whiten your teeth. Traditional veneers require the grinding down of healthy tooth structure to accommodate them, Lumineers are ultra-thin, so in most cases, you will get a perfect fit without shots, needles, or grinding down of the original tooth structure. Once the procedure is completed, there is no post placement discomfort or sensitivity, which means Lumineers will look natural and feel comfortable from the moment they are placed. I think I need braces, but I really don't want to go through the inconvenient, unsightly, and time-intensive process.

### Can I get Lumineers instead?

In most cases, yes. Your dentist will be able to evaluate your teeth and decide whether orthodontics is necessary. If you do not have a severe problem, Lumineers will change the shape and alignment of teeth, making them look straighter and more uniform.

### How long will Lumineers last?

Clinical testing has proven that a Lumineers procedure lasts and looks great for over 20 years. Lumineers also offer a warranty and are replaced at no charge. Certain restrictions do apply.

### Can Lumineers be taken off if I want them removed?

Yes, Lumineers are completely reversible because there's no grinding down of healthy tooth structure. Your natural teeth are still intact and strong.

### With Lumineers, can I still chew gum and eat my favorite sticky foods?

There are no limitations to what you can eat or drink as Lumineers are placed over original teeth in the most durable way possible. However, you should continue to visit your dentist every 6 months for a check-up and cleaning to keep your Lumineers looking their best.

### Why have I never heard of Lumineers before?

More than 13,000 dentists nationwide use Lumineers and we continue to educate the dental community on the procedure.

### The Lumineers difference

They're not veneers, they're Lumineers – a difference you can see.

There's simply no substitute for Lumineers. Unlike traditional veneers that involve a much longer more painful process that can take months, Lumineers are the quick easy way—just 2 dentist visits—to a beautiful smile, beautiful you.

### The traditional veneers process

Traditional veneers are sometimes referred to as crowns or caps. These porcelain sleeves are placed over your teeth through a process that can demand the extensive grinding down of healthy tooth structure. This can require painful shots, and many long dentist appointments.

Temporary crowns are placed on your teeth while your traditional veneers are made, it can take months before your veneers are ready. Your temporaries are then removed, which also may require shots and needles, and your permanent veneers are inserted. Sometimes additional appointments are required to ensure that your bite is correct.

### The Lumineers difference

Unlike traditional veneers, with Lumineers there's no shots, no drilling of sensitive tooth structure, and no pain. That's because Lumineers are ultra-thin so they can simply be placed over your existing teeth.

Whether you transform your smile with Lumineers or Lumineers with Luminate in new LUMITray Technology, it takes only 2 easy visits to your dentist to bring out your beautiful smile. And when you catch a glimpse of your new smile, you'll find that you just can't stop smiling.

### Are Lumineers right for Me?

Learn what Lumineers can do to transform your smile: [www.dentalcarebudapest.com/contact](http://www.dentalcarebudapest.com/contact)

### Indication

- ✓ In case of the front teeth are tarnished and grayish, and bleaching is not efficient (e.g. acquired tetracycline discoloration).
- ✓ In case of the shape of the front teeth is not appropriate.
- ✓ In case of immaturity of the structural components of teeth, the enamel and dentin (Enamel and dentin hypoplasia).
- ✓ In case of state abnormality of front parts that may not be regulated with dental care or the Patient does not wish it to be regulated.
- ✓ In case of diastema of front teeth.
- ✓ In case of the Patient is not satisfied with her/ his smile aesthetic look.
- ✓ In case a part of the front tooth has broken off and it is not suggested to repair the missing part with a filling.

It is possible before the treatment to make a so called "smile design" to plan the shape and the color of those teeth which are wanted to be modified with veneers.

### Guarantee

Guarantee may be claimed for breaking and cracking of veneers what is not caused by an accident, physic or acquired bruxism or new hobby (e.g. piping etc.). Warrantee lasts for three years and may be claimed when the patient participates in the half-year check-up or follow up examination and the dental hygienic consultation. Download our guarantee terms from [www.dentalcarebudapest.com/guarantee\\_terms](http://www.dentalcarebudapest.com/guarantee_terms)

### Guarantee may not be claimed

- x Upon aesthetic consideration (e.g. one desires other shaped tooth or different color).
- x In case of decaying tooth.
- x In case of the Patient does not participate in the half-year check-up examination and dental hygienic consultation.

### Home care and cleaning

It is inevitable to take a proper and thorough care of teeth. Regular use of adequate tooth brush, tooth paste and dental floss is a must. Cleaning of teeth is carried out in compliance with the advice and guide of a dentist or a dental hygienist. You need regular dental hygienic consultation!

## Testimonials

*"My smile looks fantastic now that I have Lumineers. People who have known me all my life stop me and admire how nice my teeth look. I refer you to all of my friends. Thanks for everything."*

Lynn P., USA

*"My teeth are very sensitive to hot and cold, but the process of putting the Lumineers on was absolutely painless. It was fantastic. I am still surprised that there was no pain involved. I would not have gotten the Lumineers if it meant grinding. I think some people used to think that I was a little cold because I would not smile with a full smile. Now I can, and I don't feel inhibited in any way."*

W. Bayne, UK

*"The results are fantastic and the procedure was so simple and fast. I love my Lumineers. They really make a difference in my appearance and even my confidence. It's great that I can smile now and know that people are staring because they look so terrific."*

Brandon R., USA

*"After my car accident in January 2006, I feared my smile would never be the same again. Now with Lumineers, my broken and discolored teeth are not only more beautiful and whiter, but they have been straightened so that they won't break further in the future."*

P. Rose, Ireland

*"Stained, chipped, crooked...you name it, my teeth were horrific. I don't think I've ever smiled with my lips parted until now. Now that I have Lumineers I am so upset that I never considered getting them sooner. The process was so painless and quick. In only a couple appointments I had a brand new smile. I am overjoyed with the results. Dr. Dhayni did such a marvelous job. I wholeheartedly recommend Dr. Dhayni and his friendly staff! Thanks for everything."*

Michelle I., USA

*The one thing that I am really excited about with Lumineers is that they don't have to be specially treated. With Lumineers, I can just brush my teeth and go, which is a wonderful thing because I know if I had traditional veneers or other procedures that would require extra attention, I probably would not carry through. However, with Lumineers, all I have to do is brush and floss my teeth like they were just my normal teeth and I am good to go. It makes me feel so good now. With Lumineers I can't stop grinning. I am grinning ear to ear!"*

M. La Flamme, Italy

## Important Notice

None of the dental treatments are completely risk free. Your dentist is going to take reasonable steps to limit any kind of complications of your treatment. However, there are some complications that tend to occur with some regularity.

If you have any questions about these complications, or about any other complications you have heard or thought about, please do not hesitate to ask your doctor.
